FINGERPRINT & CARD ACCESS CONTROL AND TIME ATTENDANCE

HUNDURE RAC 960 PEF

Networked Biometric Fingerprint & RFID Proximity Card Access Control Terminal

HUNDURE RAC 960 PEF Optical Fingerprint & RFID Card Access Control and Time Attendance Terminal

Product Overview

The **HUNDURE RAC 960 PEF** is an all-in-one biometric fingerprint and RFID card access control and employee time attendance terminal designed for corporate offices, industrial facilities, banks, and commercial buildings in Bangladesh. Combining high-speed optical fingerprint recognition with proximity card verification, the terminal prevents unauthorized entry and eliminates time-tracking inaccuracies while integrating seamlessly with electric door locks and centralized attendance software.

Key Features & Operational Advantages

- **Multi-Mode Authentication:** Supports Fingerprint only, Proximity RFID Card only, or combined Card + Fingerprint verification for heightened security zones.
- **Fast Optical Fingerprint Sensor:** Delivers rapid, accurate biometric matching in under 1 second to prevent shift-change queues and eliminate buddy punching.
- **Integrated Door Access Control:** Directly controls magnetic locks, electric bolt locks, exit push buttons, door contact sensors, and external alarm outputs.
- **Reliable Network Connectivity:** Built-in TCP/IP and RS-485 interfaces enable real-time data synchronization and centralized device management over office LAN.
- **24/7 Tamper & Door Monitoring:** Equipped with an anti-tamper switch and door-held-open / forced-entry alarm alerts for continuous perimeter protection.

Technical Specifications

Parameter	Specification Details
Brand & Model	HUNDURE — Model: RAC 960 PEF
Product Type	Fingerprint & Card Access Control and Time Attendance Terminal
Verification Modes	Fingerprint, RFID Proximity Card, Card + Fingerprint
Communication Interface	TCP/IP, RS-485
Access Control I/O	Lock Relay Output, Alarm Output, Exit Button Input, Door Sensor Input
User Interface	Backlit LCD Display with Tactile Numeric & Function Keypad
Typical Applications	Corporate Offices, Garments & Factories, Banks, Server Rooms, Hospitals, Universities
